Summary

Full stack Developer with 4+ years of IT experience designing and building scalable, high-performance web applications using **React.js**, **Node.js**, **Express.js**, and **PostgreSQL**. Expert in creating responsive, user-centric interfaces and robust backend services with a focus on clean code, maintainability, and seamless user experience.

Technical Skills

- **Languages:** TypeScript, JavaScript (ES6+), Python (Pandas, NumPy)
 - **Frontend:** React.js, Redux, Context API, HTML5, CSS3, Tailwind CSS
 - **Backend:** Node.js, Express.js, Docker, Kubernetes, JWT, GraphQL, Jenkins, Github Actions
 - **Database & ORM:** PostgreSQL, MongoDB, Redis, Prisma, Mongoose
 - **Testing & Tools:** React Testing Library, JIRA, ServiceNow, Kibana, Git, GitHub, VS Code
-

Work Experience

Full-Stack Developer [Capgemini | Nov 2022 – Present]

- Developed and maintained full-stack web applications using **Express.js**, **React.js**, and **Node.js**, delivering scalable solutions across multiple enterprise projects.
- Created modular React components and integrated them with **RESTful APIs** to improve frontend performance and maintainability. Built secure backend services with Express.js and Node.js, incorporating **JWT authentication** and data validation for robust API communication.
- Optimized MongoDB schemas and queries using **Prisma**, resulting in faster data access and reduced server load.
- Collaborated in Agile teams with designers, QA, and DevOps to ensure timely delivery of features with minimal post-deployment issues. Contributed to **CI/CD pipelines** and performed over 50 code reviews, enhancing code quality and reducing deployment-related errors by 25%.

RPA Automation Developer [Capgemini | May 2021 – Nov 2022]

- **Led a team of 3 analysts** and drove automation initiatives that enhanced data reporting and system reliability.
 - **Implemented monitoring systems** and automated ticket tracking, reducing system downtime and ticket volume by 15%.
 - **Developed automation scripts in Python**, saving 25+ hours monthly and boosting operational efficiency by 20%.
 - Analyzed recurring system incidents to identify root causes, streamlining escalation processes and improving overall reliability.
-

Projects: WorkBench — Internal Workflow & Analytics Platform

Tech Stack : React | TypeScript | D3.js | Redux Toolkit | Node.js | Express.js | PostgreSQL

- Built **WorkBench**, an internal enterprise workflow and analytics platform with role-based access, approval workflows, validation, and full audit trails.
 - Developed interactive dashboards and scalable data tables using React and D3, optimized for large datasets with caching, memoization, and virtualization.
 - Owned the solution end-to-end, covering product design, frontend architecture, mock backend APIs, performance optimization, testing, and deployment.
-

Education

G H Raisoni College of Engineering, Nagpur
Bachelor of Engineering

Jun, 2021
