Summary

Frontend Software Engineer with 5 years of experience designing scalable enterprise applications with strong focus on performance, maintainability, and system reliability. Skilled in transforming complex business requirements into efficient, user-centric solutions through modular architecture, optimized data flow, and scalable frontend design.

Technical Skills

- **Languages:** TypeScript, JavaScript (ES6+), Python(pandas)
 - **Frontend:** React.js, Next.js, Redux Toolkit ,Context API, HTML5, CSS3, Tailwind CSS
 - **Backend :** Node.js, Express.js, REST APIs, JWT, OAuth, GraphQL
 - **Database & ORM :** PostgreSQL, MongoDB, Redis, Prisma, Mongoose
 - **Cloud & Infra :** AWS, Render, Vercel , JIRA, Apache Kafka, Prometheus, Grafana
 - **Testing & Tools:** React Testing Library, Vitest, Jest, Git, GitHub Actions (CI/CD awareness)
-

Projects: FitWell Next.js, Node.js, PostgreSQL, Prisma, AWS, Tailwind CSS

- Built a full-stack fitness SaaS platform with an AI-driven workout and diet planner, personalized to user goals (weight loss, muscle gain) using Ollama, alongside a personal goal tracker and progress dashboard.
 - Implemented role-based access control (RBAC) with JWT authentication across four user roles — Guest, User, Creator, and Admin — with protected routes on both Next.js middleware and Express.js API layers.
 - Designed a community module where users build public fitness profiles, share progress, and grow a follower base, with a multi-vendor eCommerce marketplace for fitness products backed by commission-split logic.
 - Configured observability using Prometheus and Grafana for API health monitoring, and deployed frontend on Vercel with AWS CloudFront for CDN-based asset delivery; set up CI/CD via GitHub Actions.
-

Work Experience

Frontend Developer - Capgemini [Feb 2022 – Present]

- Engineered scalable analytics dashboards using React.js, Chart.js, Tanstack Query, React Hook Form, and TanStack Table with Node.js APIs and SQL databases, enabling efficient handling of large datasets and complex business workflows.
- Built reusable and high-performance React component architecture while migrating legacy interfaces to modern React applications, improving maintainability, UI consistency, and rendering performance.
- Developed advanced data-driven features including dynamic tables, filtering, pagination, form workflows, and API integrations with robust caching, error handling, and optimized state management using Redux and Context API.
- Collaborated closely with backend and QA teams in Agile sprints to deliver production-ready features with improved application stability, reduced regressions, and faster release cycles.

RPA Automation Developer - Capgemini [May 2021 – Mar 2022]

- **Led a team of 3 analysts** and drove automation initiatives that enhanced data reporting and system reliability.
 - **Implemented monitoring systems** and automated ticket tracking, reducing system downtime and ticket volume by 15%.
 - **Developed automation scripts in Python**, saving 25+ hours monthly and boosting operational efficiency by 20%.
 - Analyzed recurring system incidents to identify root causes, streamlining escalation processes and improving overall reliability.
-

Education

G H Rasoni College of Engineering, Nagpur
Bachelor of Engineering

Jun, 2021
8.38 CGPA
